Intro

For this week's workshop, you will need to work on an exercise and implement all of the SCSS properties that you learned during the week to stylize and make the pages responsive.

Use "@media" to make the page responsive.

01

Apply the styles, as shown in the screenshot below.

3

Break a leg!

4

Please use the screenshots folder to see how the page should look. If there is not enough time, try to finish the exercise at home. Feel free to use suitable different images for the exercises if not provided.
